**Training  
direct from the  
manufacturer**

# YOU'RE IN SAFE HANDS

Versalift Training Direct are serious about your safety. Our qualified instructors ensure that your staff receive quality training, direct from the platform manufacturer. Working nationally, we offer first-hand knowledge and tuition on all categories of access platform.

Training improves operator safety, increases productivity, enhances awareness and fulfils your legal obligation for the operation of a MEWP.

As an accredited IPAF training centre we provide the full range of IPAF courses including Operator, Demonstrator and CAP Service and Maintenance courses. We are one of only a few training companies to offer the IPAF Competent Assessed Person course.

Training can be given at our HQ purpose-built training facility or at your own premises, whichever is most suitable.

IPAF promotes the safe and effective use of powered access through its Powered Access Licence (PAL card). Valid for five years, a PAL card is the most widely held and recognized proof of training for platform operators.

## TRAINING COURSES

### Operators

This course instructs an operator to prepare and safely operate various types of MEWPs.

### PAL+

PAL+ is an optional, additional one day of category-specific training aimed at operators working in higher risk or challenging environments.

### IAD - Insulated Aerial Device

This course instructs an operator to prepare and safely operate an insulated platform.

### CAP - Competent Assessed Persons

This course provides guidance for platform engineers on compliance with regulatory requirements and to offer documented evidence that individuals can be regarded as competent persons to plan, manage or carry out thorough examinations of powered access equipment.

### Demonstrators

This course trains a demonstrator to familiarise operators with their responsibilities and demonstrate pre-operational and safe operating procedures and the limitations of MEWPs.

### Instructors

This course trains and assesses an instructor to understand the delivery of the IPAF training programme, and assesses knowledge on machines and ability to convey information to candidates.

### MEWPs for Managers

MEWPs for Managers is the essential, one-day course for those who plan, supervise and manage the use of mobile elevating work platforms in the workplace.

### Harness Use and Inspection

This course instructs a user to select, inspect and use a harness and associated equipment safely when using a MEWP.

### Loading/Unloading

This course instructs an operator in the correct safety procedures for the loading, unloading and securing of machinery prior to or following transportation by road.

### Pre-Delivery Inspection (PDI)

This pre-delivery inspection course enables trainees to perform PDIs of MEWPs in a structured and systematic way.

### IPAF training categories and equipment types

IPAF Category	Equipment Type
1a, 1a+	Static Vertical 
1b, 1b+	Static Boom   
3a, 3a+	Mobile Vertical  
3b, 3b+	Mobile Boom 
PAV	Push-around Vertical 
IAD	Insulated Aerial Device
