Press Release: For immediate release.

The All-New Versalift E6 Pick-Up Mounted Platform gets Type Approval

Versalift UK, the largest manufacturer of vehicle-mounted platforms, has launched an all-new Euro 6 version of its popular pick-up mounted platform, complete with LV insulation.

The LAT135-H E6 has undergone a complete re-design and is mounted on a Toyota Hilux single cab. It has a working height of 13.3m, an outreach of 6.1m and a 230kg platform capacity.

The new model complies with Euro 6 and features a stronger, lighter boom structure manufactured from high strength, high tensile steel. The design delivered the required weight reduction without any compromise to overall structural integrity. Key features include:

- New stronger, lighter boom
- Re-engineered pedestal
- Class leading spare payload
- LV certified insulation
- Double A-frame outriggers for narrow set up
- Two year warranty
- National Small Series Approved allowing fast delivery

The new NSSA approval allows the LAT135-H E6 to be self-certified and internally audited by Versalift UK with the benefit of reduced lead times and faster delivery for customers.
