Ref: AB/02/19 – Isuzu Tow Bar Approval

Press Release: For immediate release.

Versalift UK Gain Official Tow Bar Approval for ISUZU D-Max

Versalift UK, Team TIME's largest mounting facilities of vehicle-mounted platforms, have gained sign-off and Type Approval for the addition of a tow bar on its ISUZU D-Max single cab pick-up mounted platform.

The approval makes Versalift the first pick-up mounted platform manufacturer to have gained official tow bar approval from ISUZU UK for use on 3.5 tonne uprated vehicles.

Equipped with LV certified insulation, the 13.3m LAT-135-H E6 platform is popular with arborists, utilities and telecoms companies for both on and off-road use and the tow bar approval makes it an even more versatile workhorse for operators wanting to attach chippers, shredders, trailers etc.

Andy Bray, General Manager-Director for Versalift UK, said: “Our engineering team worked closely with ISUZU UK and their tow bar supplier to achieve this approval and I am delighted to now be able to offer this option to Versalift customers.”

With an outreach of 6.1 metres and 230kg platform capacity, the platform has over 500kg of spare payload capacity, after driver, passenger and fuel. Complying with Euro VI regulations, it features a boom manufactured from high strength, high tensile steel.
