

**Versalift United Kingdom Limited**  
**Company Statement – Covid-19 - 18<sup>th</sup> March 2020**

We are now all aware of the severity of the COVID-19 outbreak across the world.

Versalift United Kingdom Limited are committed to the health, safety and wellbeing of our employees and have executed a robust approach in the containment of the coronavirus outbreak, whilst mitigating its impact on our team, customers and our wider business operations.

Our business continuity plan has been mobilised to mitigate business exposure and we continue to monitor developments as they arise. We will continue to act in line with advice from The Department of Health, the World Health Organisation (WHO), along with other relevant communications.

During this unprecedented period, our organisation will continue to work hard to satisfy our obligations, both in our commitment to customers and suppliers, and in the provision of uninterrupted after sales service and support to users of our equipment.

We appreciate Versalift users depend on the products and the services we provide. Rest assured; we are bringing the same passion to meeting this challenge that we do in everything else we undertake. Our ultimate measure is not where we stand in times of stability, but where we stand in times of uncertainty and hardship.

Andy Bray  
General Manager-Director  
Versalift United Kingdom Limited.
