Ref: TF/10/05 – Versalift VTL E-Transit

Press Release: For immediate release

THE NEW VERSALIFT VTL ALL-ELECTRIC HITS THE ROAD

There's a sense of great excitement at Versalift United Kingdom as the new VTL 135 All-Electric hits the road with its 100% electric boom and the new All-electric Ford E-Transit, this urban duo takes the lead in electrifying performance, without compromise. A new boom, higher payload, no stabilisers, impressive range on full-charge, plus reduced maintenance costs, all work together to optimise your productivity.

This innovative product combines the market-leading performance of the Versalift VTL-135 with the eco-friendly and cost-effective capabilities of the Ford E-Transit and comes equipped with the new Ford Pro system, a complete and flexible end-to-end commercial fleet solution designed to help increase vehicle uptime and maximise productivity for businesses.

The ever-popular Versalift VTL-135 is a platform that has a market leading maximum working height of 13.5 metres and outreach of 8 metres. It is designed to provide reliable, safe, and efficient performance in any application, whether it's for electrical or telecommunications work or street lighting needs.

Rated to the same stability criteria and tested as per its diesel cousin, the VTL E-Transit delivers quiet operation while performing an impressive number of 20 cycles.

Other features include an independent power source for the boom, articulated flyboom, two person SWL to bucket, best in class electric driving range and over 500kg of payload after driver and passenger.

'Transit Triumph', the all-electric E-Transit is a versatile and sustainable commercial vehicle that delivers a best-in-class driving range, saving businesses money on fuel and

maintenance costs. Its zero-emissions design and advanced driver-assist technologies also make it an ideal choice for companies looking to reduce their carbon footprint and comply with emissions regulations.

When combined, the Versalift VTL-135 and the E-Transit create a powerful, sustainable, and efficient solution for access work. Operators can now reach new heights and complete their tasks with ease and peace of mind, knowing that they're using the latest technology to minimise their environmental impact and optimise their productivity.

"As a newly awarded Ford Pro Converter, we are thrilled to introduce the Versalift VTL-135 on the all-electric E-Transit," said Andy Bray, Managing Director at Versalift United Kingdom Limited. "This product is a testament to our commitment to innovation and sustainability, and we are confident that it will help our customers achieve their goals in a cost-effective and eco-friendly way."

The Versalift VTL-135 on the E-Transit is available for order now. For more information about this product call 01536 721010 or email sales@versalift.co.uk
