TO: All Versalift Users

SUBJECT: Hydraulic Pressure Filters

SERVICE BULLETIN REF. 07/1102

DATE: November 07

As part of our continuing product improvement programme we have introduced a pressure filter into the hydraulic system to ensure the cleanliness and long life of the hydraulic system and its components. The element in this filter should be replaced every 6 months at the same time as the existing return line filter. Replacement elements for the new pressure filter are available from Versalift Distributors UK Ltd under the part number VDL1050-184/2.

If you wish to fit the pressure filter to earlier machines please contact Versalift Service who will arrange for the work to be carried out.

This bulletin is for technical information purposes only and does not constitute authority for mandatory replacement of parts or warranty claim submission.

If you have any questions, or if further information is required, please contact the Versalift Technical Help Line on 01536 721010
